The Need for Accessibility Information

We are **more likely** to visit if **access information** is available.

We feel **anxious** about **visiting** a place for the **first time**.

We **would not visit** a place if it **did not have** access information.

The Problem We Seek to Solve

Disability is
the death of
spontaneity.

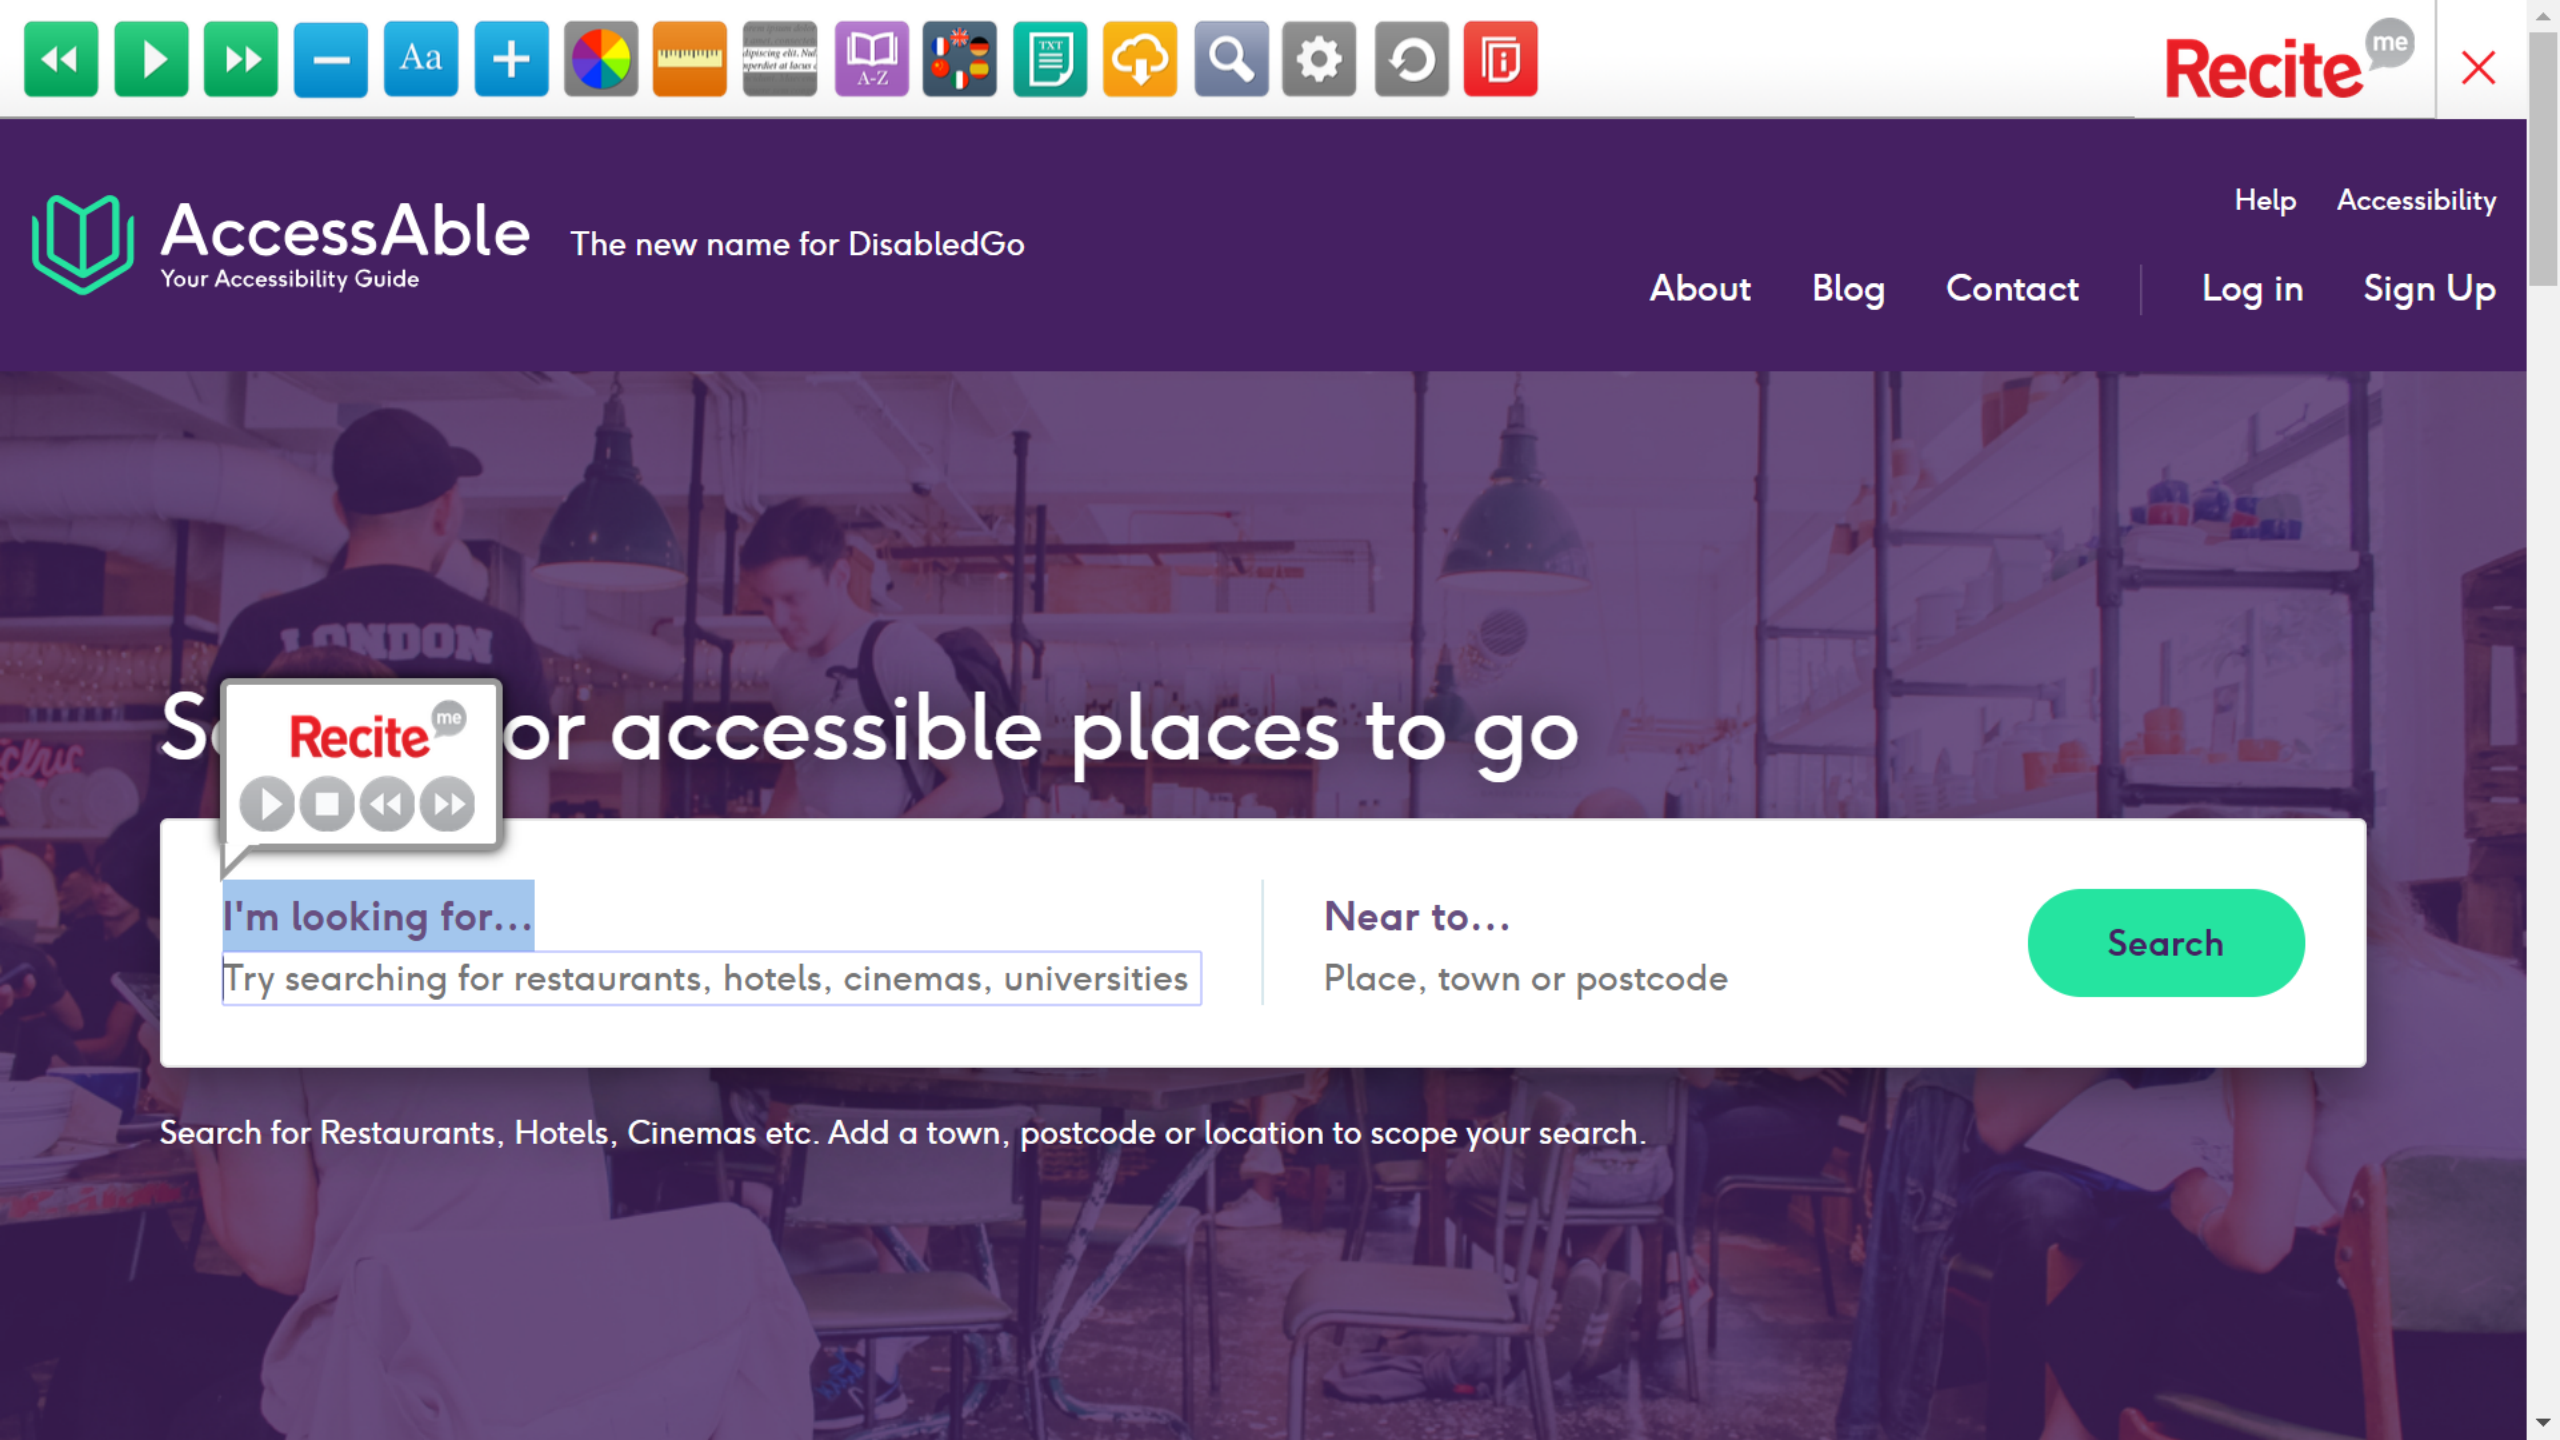

Accessible
to who?

If I don't
know,
I don't go.

Access
information is
as important as
opening hours
and location
detail.
